

CLAIMS

What is claimed is:

1. A vehicle lift rack mounted tool organizer for use with a conventional vehicle lift rack of a type having rack arms, said organizer comprising:

5 a storage volume, said storage volume formed by a bottom connected to a plurality of vertical sidewalls and having an articulated lid, support means connected to said storage volume for grasping said rack arm in a manner that allows the organizer to be supported through gravity impingement extending cantilever outward from the support means

10 in a manner that hangs below the horizontal level of the rack arm;

means for supporting pneumatic driving tools;

means for supporting tools formed by a lateral support plate;

means for supporting cups; and

15 means for supporting rags.

2. The vehicle lift rack mounted tool organizer of Claim 1, further comprising a slidably retained storage drawer provided along the lower surface of the organizer, thereby allowing for additional storage.

20 3. A vehicle lift rack mounted tool organizer comprising:

support means for mounting to the support arms of an otherwise conventional vehicle lift rack; and

5 a main containment volume formed in a boxlike fashion extending cantilever outward from said support means in a manner that hangs below the horizontal level of said rack arm ;

a hinged, lockable lid affixed to and covering said main containment volume.

10 4. The vehicle lift rack mounted tool organizer of Claim 3, wherein said support means comprises a pair of support hooks, for grasping the rack arm in a manner that allows the containment volume to be supported through gravity impingement, without the necessity for permanent fasteners.

15 5. The vehicle lift rack mounted tool organizer of Claim 4, wherein said hooks are laterally adjustable in size, from between 3 inches to 5-1/2 inches in order to accommodate various standard makes of lift racks currently commercially available.

20 6. The vehicle lift rack mounted tool organizer of Claim 4, further comprising a lateral support plate extending horizontally from said containment volume.

7. The vehicle lift rack mounted tool organizer of Claim 6, wherein said lateral support plate further include means for supporting pneumatic driving tools.

8. The vehicle lift rack mounted tool organizer of Claim 6, wherein said lateral support plate further include means for supporting tools comprising various sized orifices formed by said lateral support plate.

9. The vehicle lift rack mounted tool organizer of Claim 6, wherein said lateral support plate further include means for supporting a beverage receptacle.

10. The vehicle lift rack mounted tool organizer of Claim 4, further comprising a slidably retained storage drawer provided along a lower surface of said containment volume, thereby allowing for additional storage.
